

Industry AI Flow

An intelligent assistant transforming how construction professionals search, verify, and utilize building codes.

The Pain Point

Construction teams spend **hours manually digging** through thousands of pages of building codes, safety manuals, and material specs. Answers are slow, scattered, and prone to human error.

Our Solution

VS A private **AI-powered search engine** that intuitively understands your documents. It delivers instant, highly accurate answers backed by precise source citations from your own data.

System Architecture

A multi-layered AI engine built for the construction industry

Smart Semantic Search

Goes beyond keywords. Finds the exact meaning behind your query using hybrid vector technology.

Intelligent Layout Parsing

Reads complex construction documents, blueprints, and tables naturally like a human engineer.

100% Data Privacy

Designed to run entirely on private hardware. Your proprietary data never leaves the network.

POWERED BY CORE TECHNOLOGIES

FastAPI

LangChain

PostgreSQL & Vector
